EMPLOYMENT HISTORY

Software Developer at Bay Master, Toms River
December 2021 — April 2022

- Developed reusable data graphs components to display quarterly/yearly sales brackets on a per category basis
- Implemented real time updates for text messaging dashboard using SignalR
- Overhauled UI layout for existing text messaging dashboard to allow ease of use based on Kendo UI specifications.
- Fixed pagination not displaying correct number of vehicles during customer vehicle searches.
- Overhauled software to be mobile responsive.

Computer Science Tutor at Ocean County College, Toms River
January 2020 — December 2020

Provided instructional support to students outside of classroom hours. Discussing the concerns and needs of the student, while finding ways to best improve the students academic performance.

EDUCATION

Applied Computer Science , Ocean County College, Toms River
September 2019 — December 2020

PROJECTS

Amiibo Party
September 2022 — October 2022

Amiibo Party is an amiibo collection app that allows you to easily search and filter for various Amiibos by game and then either wishlist or collect them. Never guess which Amiibos you already own Amiibo Party keeps everything organized for you in one location

Expensify
September 2021 — September 2021

Expensify lets you track your expenses every month. Never go over your budget again! With Expensify just enter the type of expense, cost, date, and name and easily see your updated budget. Accidentally added the wrong expense? All expenses can be removed with one tap. Want to see expenses for just a certain month. Easily switch your filter settings and view exactly what you want to.

Tap Games
August 2021 — August 2021

Tap Games is a tinder-esque website for video games, simply tap to like or dislike a game and move onto the next. Interested in a game? Tap to flip it over and get a description of the game! Really interested? A link to a variety of stores where the game is available for purchase or download are a click or tap away.
